Free Ads

Create your own free-publishing ads website

EPITECH.

Free Ads

repository name: free_ads

repository rights: ramassage-tek

language: PHP

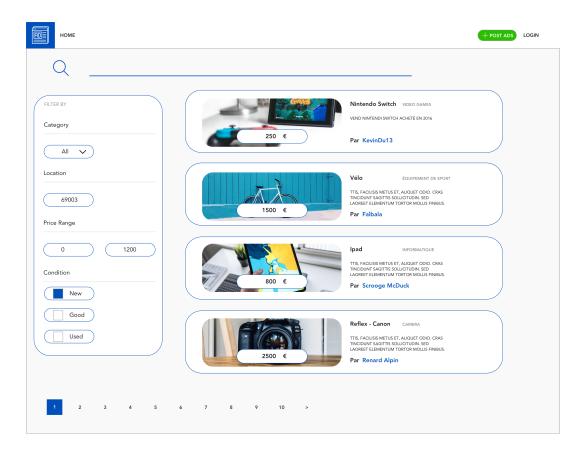

• The totality of your source files, except all useless files (binary, temp files, obj files,...), must be included in your delivery.

• All the bonus files (including a potential specific Makefile) should be in a directory named *bonus*.

• Error messages have to be written on the error output, and the program should then exit with the 84 error code (O if there is no error).

Create a free-publishing ads website with Laravel. You can use this design or be creative and create you own.

STEP 1 - USER PROFIL

- 1. Create an Eloquant Model User using Laravel Eloquent ORM
 - a. An User must at least have :
 - login
 - password
 - email
 - phone number
 - nickname
- 2. Create a authentification system (sign-up and login) with all the corresponding views.
 - a. A confirmation mail must be sent to a newly registered user to verify its account Email Verification
- 3. Create CRUD and the corresponding view

STEP 2 - ADS SYSTEM

- 1. Create a model ${\tt Ads}$ and its corresponding controler.
 - a. An ad must at least have :
 - title
 - category
 - description
 - at least one photo
 - price
 - condition
 - location
- A view allowing a authentified user to post a new ad
- A view to display all ads in rows as seen in the Homepage design
- A view to display a specific ad
- A view to edit and modify your own ads

STEP 3 - FILTER SYSTEM AND SEACH BAR

- 1. Create a search bar
- 2. Create the filter system from the homepage (by Category, Location, Price Range and/or Condition)

STEP 4 - OPTIONAL

- 1. Optimize SEO (create a footer, etc)
- 2. Responsive design (in 2020 up to 52% of all internet traffic is done using a mobile device)
- 3. Write unit-test for quality assurance of your own code Laravel Testing
- 4. Deploy your website on a true server such as OVH VPS
